FP22

HEAVY-DUTY
UNDERRIDE AMR

ENGINEERED TO HANDLE LOADS
UP TO 2 TONS

OMNIDIRECTIONAL DRIVE

The FP22 is equipped with an advanced omnidirectional drive system, enabling it to move in any direction — forward, sideways, diagonally — and rotate around its own axis. This high degree of mobility allows the robot to operate smoothly in tight spaces and navigate complex layouts with precision, ensuring seamless integration into space-constrained production areas.

HIGH PAYLOAD CAPACITY

With a maximum payload of 2000 kg, FP22 is ideal for transporting large, bulky materials and non-standard carriers. Its robust mechanical structure ensures stable and reliable performance even under full load, making it a versatile solution for demanding production environments.

ADVANCED SLAM NAVIGATION

Equipped with SLAM technology, the FP22 enables real-time mapping and accurate localization. This supports efficient route planning, dynamic obstacle avoidance, and adaptability to changing environments, ensuring reliable operation in dynamic and complex intralogistics settings.
